

Table 1 Duncan's statistics on mortalities due to exposure of *An. gambiae* larvae to crude extracts of parts of Endod

| Stage | df | Treatments | | | | | | | Neem | Deltamethrin |
|-------|----|---------------------|--------|------------|--------|--------|------------|--------|------|--------------|
| | | Parts of Endod used | | | | | | | | |
| | | Eldoret | | | Nyando | | | | | |
| | | Fruits | Shoot | Midsection | Fruits | Shoot | Midsection | | | |
| L1 | 4 | 0.0128 | 0.0001 | 0.0001 | 0.0145 | 0.1037 | 0.3729 | 0.0001 | - | |
| L2 | 4 | 0.0449 | 0.0229 | 0.0015 | 0.0660 | 0.0296 | 0.0001 | 0.0008 | - | |
| L3 | 4 | 0.0603 | 0.0234 | 0.2632 | 0.0399 | 0.0830 | 0.0490 | 0.0001 | - | |
| L4 | 4 | 0.1679 | 0.2245 | 0.0401 | 0.0037 | 0.0867 | 0.0356 | 0.9642 | - | |

Note: 1 P is the probability for the level of significance. P was considered significant at $p < 0.05$

2 df is the degree of freedom of the considered units
