MT – mortality 24 hrs post exposure, KD₅₀ and KD₉₅ refer to the time taken to knockdown 50% and 95% respectively of the sample size.

KD₅₀ and KD₉₅ for positive controls on Mwea *An. arabiensis* were 17.45 and 58.18 minutes respectively

KD₅₀ and KD₉₅ for positive controls on Ahero *An. arabiensis* were 19.75 and 57.48 minutes respectively.

KD₅₀ and KD₉₅ for positive controls on Ahero *An. funestus* complex were 18.46 and 52.86 minutes respectively.
